The MAILING DATE of this communication app Period for Reply	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: reference number 7 in figures 3a-7. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1, 2, 4-6, 11, 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Litherland et al. (U.S. Patent No. 6,732,944) in view of Amenos et al.

Application/Control Number: 10/522,344

Art Unit: 3752

Litherland et al. discloses all the limitations of the claims except for the resilient members extending from the outer section to the outer edge of the inner section.

However, Amenos et al. teaches a fluid dispersion device having a resilient member 61 extending from the outer section 62 to the outer edge of the inner section 63 (see figures 2 and 3). Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of Litherland et al. with the resilient members extending from the outer section to the outer edge of the inner section as suggested by Amenos et al. Doing so would provide a way to extend useful life of the substrate.

Page 3

4. Claims 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Litherland et al. in view of Amenos et al. as applied to claims 1, 2, 4-6, 11, 15 above, and further in view of Berglund et al.

Litherland et al. in view of Amenos et al. discloses all the limitations of the claims except for the substrate adapted to carry an electrical signal. However, Berglund et al. teaches a fluid dispersion device having a substrate 61 with outer and inner sections, and actuator 73, wherein the substrate is adapted to carry an electrical signal via conductor 76 and flange 61A (see figure 4). Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of Litherland et al. and Amenos et al. with the substrate adapted to carry an electrical signal as suggested by Berglund et al. Doing so would provide a way to energize a dispersion device.

With respect to claim 12, at the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to provide the

device of Litherland et al., Amenos et al. and Berglund et al. with the resilient member that adapted to carry an electrical signal.

Response to Arguments

- 5. Applicant's arguments filed January 26, 2009 have been fully considered but they are not persuasive in view of the Amenos et al. reference.
- 6. Applicant's arguments with respect to claims 1, 2, 4-6, 11-15 have been considered but are moot in view of the new ground(s) of rejection.
- 7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dinh Q. Nguyen whose telephone number is 571-272-4907. The examiner can normally be reached on Monday-Thursday 6:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Len Tran can be reached on 571-272-1184. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
